

With over 30 years experience in architectural design and construction, David R. “Skip” Brown III could be resting on his laurels, satisfied with three decades of a job well-done. As the in-house architect at Melvin Mark, Skip doesn’t sit still very well. He comes to work energized and eager to learn, and looks for ways to use his expertise in design to help businesses improve how they function. After years working on projects here in the U.S. and abroad, he’s both a big picture thinker and a detail guy – able to establish the design vision for a project and pay close attention to the small things, knowing that the devil is in the details.

David “Skip” Brown III, AIA/CSI-CCS
Director of Architecture

Professional Experience

Prior to joining Melvin Mark in 2009, Skip served as project architect for such reputable design firms as WPH Architecture, Barrantine Bates Lee Architects, Yost Grube Hall Architecture, SRG Partnership, CH2M Hill and Zimmer Gunsul Frasca Architects.
